## Still Seeding Greenfeed For Supply of Larger Dairy Herds; Stimulated by the Cow Bill

Crop Reports Tell of Alberta's Grain Fields Growing Green and  
Bright Prospects of Golden Harvest For Grain Growers, Mixed  
Farmers, Butter Makers and Tradesmen—Recent Rains Boost  
Growth of Grain, Grass and Gardens.

Seeding songs will soon be over, though the stimulation given to the dairy industry by the new cow bill has created in almost all the settlements a desire to grow all the green feed possible, besides there is the off chance that with a postponement of the fall frosts and a rapid growing season during the summer that grain sown for green feed may yet ripen for grain. In any case it is good feed for cows and helps to make the milk yields greater, and the dairies are smiling so loud that one correspondent says that the smile can be heard.

Let the same prospects continue from now till harvesting, stacking, threshing and marketing of grain, green feed, beef, milk, cream or butter, and then the smile will spread to the faces of all those tradesmen who do business with the farmers of Alberta.

A slight pessimistic note which occurs in some of the reports from the crop correspondents has no doubt been eliminated by the recent showers of blessing that have fallen since the reports were written.

While a few told of late spring frosts, yet the damage has not been serious and will have no appreciable general effect. Though the seeding is late, the germination after seed is

in the ground is very rapid and nature is doing the best possible to make up for lost time. Wheat sixteen inches tall and oats six inches high soon hide the black fertile fields and make a pleasing green patch on the landscape, which will in due time ripen into a golden harvest color a few short months hence.

There is now sufficient moisture to keep the growth coming along nicely. Pasture grasses and hay meadows will show the effect of the rains. The gardens are doing nicely, though some of the seedlings are being damaged by the most tender and too early sown cucumbers and tomatoes.

The following reports were received from the Bulletin's own correspondents and reveal the view of the farmers of the localities round about Edmonton. Some were written before the recent rains.

**At the Waterhole.** In the Peace River country, the crops are looking healthy, though a little late. There has been lots of rain and the seeding was completed in good time. The farmers are now breaking new land.

**At Hinton.** On the Smoky river, at east end of Grande Prairie, the acreage in wheat this year is the largest in the history of this district. Present prospects indicate a bumper crop. Grain is good color and six to ten inches high. The acreage in oats much less and owing to five weeks' continued rain the farmers were unable to get on the land. The present warm, rainy days are improving prospects and crops look to be good on high land. The acreage in barley is larger for this district, much better than last year, owing to lateness of season. All crop shows a satisfactory condition. Hay, timothy and all wild grasses are at their best. Prospects are for a heavy yield. The acreage in potatoes is large and with plenty of sunshine, the crop will be satisfactory.

**At High Prairie.** to the N.W. of the city, the growth is very rapid. Both grain and grass are considerably further advanced than at this time last year.

**At Fort Assiniboine.** on the Athabasca river, to the N.W. of the city, the crops are suffering for rain. The continuous frosts are telling on the wheat and oats. The gardens, too, are suffering for rain.

**At Glenora.** to the north-west of the city, rain was very much needed for the ground was getting very dry and gardens were at a standstill. Grain that was sown deep is not suffering but shallow sown grain needs rain badly.

**At Ston.** to the north-west of the city, the weather is very dry and nights cold, but the crops are progressing wonderfully well. Seeding is now completed and a good rain in all that is necessary to secure a good crop.

**At Westlock** to the N.W. of the city, the bulk of the seeding was finished a week ago. Some late crops and green feed are being seeded. The crops are all looking well though rain has been very scarce. Most of the farmers have put in a good share of their land to wheat. Oats rank next. Garden and field roots are not receiving the attention they would in an earlier season. Most of these are just showing through the ground. Hay promises to be good.

**At Bushy.** to the north-west of city, seeding is practically all finished, with the exception of a little green feed. The grain which was sown early is doing very well. There were a few frosty nights, but it didn't seem to harm the crops any. The only thing that was hurt was some tender garden truck such as tomatoes, citron and cucumbers.

**At Riviere Qui Barre.** to the north-west of the city, seeding is all finished and some farmers have commenced to plow summer fallow. There is considerable more acreage in grain and more wheat sown this year than last.

**At Cardiff.** to north of city, seeding is finished and all grain looking first-rate. A good soaking rain would be of great benefit, particularly to timothy and upland hay.

**Wheat Sixteen Inches High.** At Excelsior, to the north of the city, the earliest sown wheat was 16 inches high before the rain of Saturday night and Sunday morning. While the crops were not suffering, yet the recent rain will cause the grain and garden truck to shoot up vigorously. Some are still seeding barley and green feed. Others who have finished are busy breaking.

**At Sunnyside.** to the north of the city, crop conditions will be very greatly benefited by the recent rains. The earliest sown wheat is over 16 inches high and oats are now 4 inches high. Seeding is all finished except green feed. The farmers are smiling at Sunnyside.

**At Nampa.** to the north of the city, the crops are in fine condition but would be benefited by rain. Some of the oats were touched by frost but no damage was done. The majority of farmers are sowing their green feed.

**At Crescent.** to the northeast of the city, a few of the farmers have finished seeding except their green feed. In some places the wheat is six inches high. Oats are from four to six inches high and barley just peeping through.

**At Creighton.** to the northeast of the city, the crops are looking fairly good but rain is needed to hurry them up.

**Cow Bill Stimulates.** At Thorsild, to the N.E. of the city, the grain is all up and some fields are light for this time of year there is an abundance of moisture. Potatoes are up and there is considerable increase in root crops owing to the stimulation of the dairy industry, as a result of the recent legislation to encourage that industry.

**At North Bank.** down the Saskatchewan to the east of the city, seeding is all done except for some green feed. With some rain and warm nights the crops would be fine. Oats are the main crop but some places this year have from 30 to 40 acres in spring wheat. When the Oliver-St. Paul branch of the C.N.R. reaches here the acreage will be increased for up to now the nearest station has been Bruderheim, 35 miles away. Heretofore it has taken a farmer almost a week to get a load of grain or hogs to market and return home. It was so cold on the night of June 12th that potatoes and beans were cut right down and on some farms spring wheat was badly frozen. West of here there is considerable acreage yet in stubble.

**At Challey.** to the east of the city, seeding is all finished excepting some patches of green feed. So far, the present is a season where good farming shows well. In such cases no damage has as yet been done by drought. On low lying lands, frost has bitten the young blades and on land improperly farmed rain is much needed.

The following crop reports are from the district exchanges and no doubt rains have fallen since these reports were written:

**Wheat 15 Inches Tall.** At Bittern Lake, a stalk of wheat fifteen inches in length was pulled from a field. It is not a freak because its companions in the same field are about the same stature.—Camrose Canadian.

**At Vermilion** the crops are looking

## GREEK'S NEW RULER

KING ALEXANDER, of Greece, the monarch chosen by the entente powers to supplant a rascally royal parent.

## ALLIES SHOCKED BY PROCLAMATION JUST ISSUED BY NEW GREEK KING

London, June 20.—The publication of the proclamation of the new King Alexander of Greece came as a shock to England, France and Italy. The new and youthful monarch pledged himself to carry out "the brilliant policy of his revered father," the notoriously pro-German Constantine, and uses the language of an absolute monarch.

The press of the allied nations demands if it has been hoodwinked, and if another German diplomatic trick has succeeded in the Balkans. There is a universal demand that if King Alexander attempts to follow any such course as did Constantine he be instantly ejected without ceremony, that the allies take direct control of the country, establish Venizelos in power, and keep him by force there if necessary.

green and with good rains will come along fast.—Vermilion Standard.

**At Dinant.** the cool temperature of the evenings made life precarious for the tender crops, but we hope no serious damage will be done by the frost.—Camrose Canadian.

**At Lundemo.** after a refreshing shower, you could almost hear the farmers smile.—Camrose Canadian.

**At Louisa.** seeding is completed on the hill.—White Court News-Record.

**At Kewistick.** spring work is nearly done. The soil is in excellent shape and in spite of the rather cold weather, the seed comes up almost as soon as it is seeded.—Innisfail Province.

**At Ferintosh.** rains are badly needed in many parts as the ground is drying up fast.—Camrose Canadian.

**At Camrose.** a few showers of rain would not come amiss. The ground is reported to be very dry.—Camrose Canadian.

**2,000 Acres More Crop.** At Irma.—Seeding is all finished in this district. There are about two thousand acres more in crop this year than in 1916.—Wainwright Star.

**At Ohaton.** seeding is now practically finished and farmers are preparing for green feed. The crops are looking well, but would almost as soon as it is seeded.—Innisfail Province.

**At Ferintosh.** rains are badly needed in many parts as the ground is drying up fast.—Camrose Canadian.

**At Camrose.** a few showers of rain would not come amiss. The ground is reported to be very dry.—Camrose Canadian.

**At Stettler.** growth has been fairly rapid, but a little rain, would do no harm.—Stettler Independent.

**At Logan.** the crops are looking fine and are well advanced for this time of the year. With the exception of the green feed crop, seeding is about finished. The Robarge boys finished seeding last Thursday. G. A. Trent finished seeding 300 acres.—Tofield Advertiser.

**At Ketchikan.** the farmers are about all through seeding, and some are making for green feed.—Tofield Advertiser.

## SCHEME RUMORED TO FLOOD MINES TO WIN DEMANDS

Suspension For Short Time Of  
Certain Workers Would  
Cause Inundation

Fernie, B.C., June 20.—A dispatch was received here this morning to the effect that a scheme was being initiated by the Bankhead miners to flood the mines of district 18 in the event of the operators failing to accede to the settlement suggested by Hon. R. F. Green, government commissioner. The miners claim that Mr. Green submitted certain proposals to the miners' policy commission which were acceptable to them as final concessions. The operators agreed to all but one of these proposals, namely, the deletion of the penalty clause. This the miners emphatically insist upon. The operators refused to accede to this was not unreasonable on their part. Thus, the negotiations were again severed, and the miners feeling that if the Dominion government does not within one week endorse the ultimatum of the miners' commission, then they will be justified in adopting every means within the law to enforce their demands.

The first step in this direction has been a resolution from Bankhead that in the event of the government not taking definite action by Saturday next all mine employees shall be immediately withdrawn from the mines. Endorsement of this resolution is understood to have been given by other locals. The possibility, therefore, is that after that time all employees working in the capacity of caring for the mines, including pump men and fan men, will cease, and even a short suspension of these workers will result in some of the mines becoming inundated and large accumulations of gas forming which will be extremely serious, as it will necessitate extensive repair operations for a lengthy period to restore such mines to the condition that coal again can be produced.

Any attempt to replace the Union employees in these capacities by others undoubtedly would precipitate a more serious clash between the opposing interests.

## MRS. PANKHURST TO PLEAD ALLIES' CAUSE IN RUSSIA

Says Ramsay MacDonald's Attitude in Present War is  
Purely Political

Petrograd, via London, June 20.—Mrs. Emmeline Pankhurst, the British suffrage leader, made an unexpected arrival in Petrograd yesterday. Mrs. Pankhurst said that she had come to Russia to explain to the men and women of the new republic the attitude of the British democracy toward the war. She added that it was too early to announce exactly how she aimed to accomplish this, but she planned to appeal directly to the people and would probably address street audiences.

One of Mrs. Pankhurst's first appointments will be with Mme. Kerensky, wife of the minister of war. She is greatly interested in the formation of the women's regiment and the report that Mme. Kerensky is about to join it. In recounting the incidents of her trip from England, Mrs. Pankhurst announced with evident satisfaction that she had been present when sailors refused a passage to Ramsay MacDonald, the British socialist leader, who intended to confer with so-

## The Effects of Opiates.

THAT INFANTS are peculiarly susceptible to opium and its vari-  
ous preparations, all of which are narcotic, is well known. Even in the  
smallest doses, if continued, these opiates cause changes in the func-  
tions and growth of the cells which are likely to become permanent, caus-  
ing mental perversion, a craving for alcohol or narcotics in later life.  
Nervous diseases, such as intractable nervous dyspepsia and lack of stay-  
power are a result of dosing with opiates or narcotics to keep children qui-  
et in infancy. The rule among physicians is that children should never  
receive opiates in the smallest doses for more than a day at a time, and  
only then if unavoidable.

The administration of Anodynes, Drops, Cordials, Soothing Syrups and  
other narcotics to children by any but a physician cannot be too strong-  
ly deprecated, and the druggist should not be a party to it. Children who are

## Alkali In Shampoos Bad For Washing Hair

Don't use prepared shampoos or anything else, that contains too much alkali, for this is very injurious, as it dries the scalp and makes the hair brittle.

The best thing to use is just plain mulified coconut oil, for this is pure and entirely greaseless. It's very cheap, and beats the most expensive soaps or anything else all to pieces. You can get this at any drug store, and a few ounces will last the whole family for months.

Simply moisten the hair with water and rub it in, about a teaspoonful is all that is required. It makes an abundance of rich, creamy lather, cleanses thoroughly, and rinses out easily. The hair dries quickly and evenly, and is soft, fresh looking, bright, fluffy, wavy and easy to handle. Besides, it loosens and takes out every particle of dust, dirt and dandruff.

### VIVE LA FRANCE.

"If I have but one prayer, dear crucified Christ—save France!  
But if I have two, then, by Mary's grace,  
Carry me safe to the meeting place,  
Let me look once again on my dear love's face,  
Save him for France!"

She came to the town of the nameless name,  
To the marching troops in the street she came,  
And she held high her boy like a taper flame,  
Burning for France.

Fresh from the trenches, and gray with grim,  
Silent they march like a pantomime;  
But what need of music? Her heart beats time—  
Vive la France!

His regiment comes. Oh, then, where is he?  
"There is dust in my eyes, for I cannot see—  
Is that my Michel to right of thee?  
Soldier of France!"

Then out of the ranks a comrade fell—  
"Yesterday—twas a splinter of shell  
And he whispered thy name, did thy poor Michel,  
Dying for France."

The tread of the troops on the pavement throbbed.  
Like a woman's heart of its last joy robbed.  
As she lifted her boy to the flag, and sobbed:  
"Vive la France!"

## Eastern Star Elect Officers for 1918

Sister M. E. Carter, Worthy Grand Matron—200 Delegates Present.

The afternoon session of the sixth annual convention of the Grand Chapter of the Order of the Eastern Star on Wednesday was given up almost entirely to balloting for the officers of the coming year. The result was as follows:

Worthy Grand Matron—Sister Margaret E. Carter.  
Worthy Grand Patron—Bro. H. C. Ritchie.  
Associate Grand Matron—Sister Charity Norton.  
Associate Grand Patron—Brother Pidgeon.  
Grand Secretary—Brother J. H. Blair.  
Grand Treasurer—Sister Mary Pidgeon.  
Grand Conductress—Sister Lizzie C. Dallas.  
Associate Grand Conductress—Sister M. C. McLaughlin.  
The appointments will take place today, as well as the installation of officers.

**Civic Reception.**  
Nearly two hundred delegates are attending the convention, which opened on Wednesday morning in the Masonic Temple, 102nd street. The address of welcome was given by Commissioner Harrison, who was accompanied by Robert Engle, the secretary to the commissioners. Mr. Harrison welcomed the delegates and strangers on behalf of the city and offered them the freedom of the town, east, west, north and south. He regretted the absence of Mayor Henry, who was to have spoken, but owing to the death of his mother was unable to be present, and also apologized for the absence of Acting Mayor Wilson. However, Mr. Harrison's welcome was so hearty that the guests were more than pleased. Mrs. M. C. McLaughlin, of Lethbridge, past mistress of Maple Leaf chapter No. 7, replied in a very able manner and was witty and bright in her speech.

A reception of the distinguished guests and the grand representatives followed. The address of the grand worthy matron was given by Mrs. Margaret E. Carter, of the south side, and was a report of the past year's work. It was a splendid resume and very interesting to those assembled. A memorial service was then held for all departed members during the year and very large numbers of white carnations was given for distribution among the sick members in the hospitals. During this service Mrs. J. C. Bowden, Mrs. L. A. Laiden and Miss Choate sang suitable memorial songs.

As the election of the grand chapter officers is a lengthy procedure some of the afternoon items were taken up in order to make time for the address of the worthy grand patron and the report of the worthy grand secretary and worthy grand treasurer were heard and the meeting adjourned for the afternoon session.

**Dance at The Macdonald.**  
As a climax to a full and profitable day the delegates and their escorts gathered Wednesday night at the Macdonald Hotel for a dance as a relaxation as well as an enjoyable entertainment after the two business sessions. There was a splendid attendance and the arrangements made by the committee in charge could not have been better. It was altogether an informal affair, though the appointments were quite as elaborate as for a formal occasion. The orchestra was delightful and the refreshments delicious. The hostesses were: Mrs. Meadows, Mrs. T. Wilson, Mrs. J. W. Currie, and Mrs. J. H. Jackson. Grand of the dances were Mrs. Graham, Lethbridge; Mrs. and Mrs. Mitchell, Alex; Mrs. Morse, Calgary; Mr. and Mrs. Ganser; Mr. and Mrs. Reed; Mr. and Mrs. McCormack; Mr. and Mrs. McFarlane; Mr. and Mrs. J. ### TODAY'S INQUIRIES.

1. How can dingy rubbers be made to look like new?  
2. What is the easiest way to clean a silver mesh bag?  
3. How can a sprinkling can which leaks slightly be repaired?

4. Is it permissible to sip bouillon from a cup?  
5. Should a portion of meat be cut at once into small pieces or should each piece be cut as it is eaten?  
6. Is it proper to change the fork from the left to the right hand in conveying food to the mouth?

### ANSWERS TO YESTERDAY'S INQUIRIES.

1. Infertile eggs keep longer than fertile eggs.  
2. An egg which is to be preserved should be wiped but not washed, as washing removes the gelatinous covering which protects it and helps to keep it.  
3. Eggs can best be preserved in earthenware crocks.

4. Carefully clipping the eyelashes will stimulate the growth.  
5. Heavy stockings of wool and cotton are best for long-distance walking; a thin stocking will wear through and cause the shoe to rub the foot.  
6. Massaging the feet several times a week with cold cream will help to prevent callous spots from forming.

**To Properly Wash White Silk.**  
To the Editor of Woman's Page.  
Dear Madam,—Can you tell me the best way to wash white silk so it will turn a lovely yellow? Silk underwear wears so much better than that of batiste or muslin I have found, but the one objection to it is that it turns so yellow.

hard, turn into well-greased ring molds, filling to within an inch of the top, and bake until brown. Just before serving, dip the molds in the center with well-sugared strawberries and make a border of whipped cream around the edge.

Rhubarb and Apple Sauce—I find that apples with rhubarb enhance the flavor. Cut up an equal quantity of sweet apples with rhubarb stalks and cook together in a double boiler, using no water. Sweeten to taste when soft.

Many thanks, Mrs. C. These recipes sound delicious.

**Henning Napkins.**  
To the Editor of Woman's Page.  
Dear Madam,—In henning napkins, the hemmer attachment on the machine without thread, turn an even hem and then hem by hand. This line of accurate perforations is very easy to follow. In hemstitching, the thread is sewn into the hem neatly. With the sewing machine, the stitch regulated the length desired without thread, stitch close to the edge as in ordinary hemming.

**To Cleanse Old Vinegar Jugs.**  
To the Editor of Woman's Page.  
Dear Madam,—I have several old vinegar jugs which I am anxious to use to store other liquids in. Is there any way of getting rid of the taste of the vinegar?

It is extremely difficult to render jugs which have had vinegar in them fit for anything else, as they become so impregnated with acetic acid that you might try filling them with milk of lime and letting them stand this way for several weeks, or months if possible. At the end of this time rinse out thoroughly with warm water, then steam for an hour.

**Natural Color of Ivory.**  
To the Editor of Woman's Page.  
Dear Madam,—What is the natural color of pure ivory?

Pure ivory is a creamy-white opaque substance.

**ARTHUR MIE'S BOOK "DEFEAT" WAS BANNED**

Canadian Authorities Considered Book Would Have Effect on Recruiting

London, June 20.—In the house of commons last evening Mr. MacPherson, replying to a question put by Mr. King, whether two books by Arthur Mie, entitled "Defeat" and "The Fiddlers," intended to promote disaffection in the use of alcohol, had not been allowed by the war office to circulate in Canada, said the first of the books was stopped by the censor, which had already reached the dominion on the ground that it was most dangerous as it would most unquestionably have been a retarding influence on recruiting and have brought unnecessary anxieties to the minds of parents and others with relatives serving in England. All postal packets to and from the United Kingdom and other printed matter, he said, are liable to inspection by the military authorities.

## UP TO THE SETTLERS IN THE NORTH

While the benefits of the Farm Loans Act and the "cow bill" passed at the recent session of the legislature will be felt in all parts of the Province, the loans obtainable under these measures will be particularly helpful to thousands of settlers pioneering in the great north-land, and correspondingly helpful in changing that half of the Province into a cultivated country. Of especial advantage will the assistance be to settlers in parts of the country where the land is largely covered with timber or brush. To develop such a quarter section involves years of hard work and of real privations to the family who have little or no means to work with. Years must lapse before the product of the farm will support the family, and meantime the husband and father has to leave home for a good part of each year to find work. The time he spends working off the holding is lost time, alike to him and his family and to the community whose progress would be promoted by the transformation of the idle quarter section into a productive farm.

To settlers located on land of this character the loans securable under the new measures will be a god-send, and to those located on and more easily brought into use they will be correspondingly advantageous. The most important feature of these loan schemes is that their advantages are not confined to the farmer who is in even fairly good circumstances, but that they offer working capital to the settler who particularly needs it but who has not arrived at a position in which he can finance himself in the ordinary way.

Any settler who has obtained entry for a homestead may join with four other settlers and under the "cow bill" obtain a loan of five hundred dollars each for the purchase of cows. The interest is to be not more than six per cent, and the term of the loan five years. Just what this will mean to the family of small means on a brushy homestead cannot be lightly understood by anyone who has not tried to "stick it out" under such circumstances without luck. It means that from the first day they go upon the land the family may obtain a large part of their subsistence from it, instead of having to wait until the man can earn money elsewhere to support the family and buy a few cows. Any vacant quarter section that is worth homesteading is capable of providing pasture for cattle. The "cow bill" offers the homesteader the means of getting the cows at once, and of thereby turning an otherwise wasted crop of grass into food for his family, while beginning at once the creation of a herd of cattle. The "cow" loans are of course equally available to the man on land that has been purchased, and will be of equal value to him and his family.

Under the Farm Loans Act the settler who has obtained title to his land may borrow upon the credit of the Province up to the extent of forty per cent of the appraised value of the land; the money to be used in buying stock or implements, or bringing more of the land under cultivation, or providing buildings and improvements necessary to the operation of the farm and the comfort of the family.

The country north of Edmonton is the part of the Province where settlement is taking place

most largely, therefore the part where these loans to settlers will be particularly helpful and where the general development and progress of the community will be most notably helped by them. Elections are being held in two of the constituencies of this great region, Peace River and Athabasca. The result of those elections will to a degree be construed as showing the attitude of the settlers toward the measures designed for their assistance and will therefore give either impetus or discouragement to further efforts in the same direction, should such be required. The return of the Government supporters from those ridings will be a clear expression of approval by the settlers of the policy embodied in the loan bills. The election of opposing candidates would be a rejection of that policy; and if the policy of helping the settler were rejected by the settler it would not in the nature of things get much future encouragement from other quarters.

## WHY "IMPOSSIBLE"?

The Journal tells us that it is "quite impossible" for Sir Robert Borden to concede the public a chance to express their opinion as to whether conscription should be adopted. Just why it is impossible we are not informed save that the Journal thinks the object of the referendum proposal is to "confuse" the Dominion's war policy. That a referendum would "confuse" the war policy as much as a rebellion in Quebec—which Mr. Bennett says would follow the arbitrary enforcement of conscription—does not seem at all likely.

Sir Robert Borden has declared his willingness to submit conscription to the public at a general election—provided he is made head of a coalition Government running on the conscription policy. A general election would certainly "confuse" the Dominion's war policy and delay the enforcement of conscription quite as much as a referendum. If Sir Robert is willing to let the people vote on conscription provided their approval of conscription is made to be also an approval of Sir Robert Borden, there is no reason aside from politics why it is "impossible" for him to allow them to vote on conscription dissociated from his political fortunes.

## WOULD JAIL CITIZENS WHO TALK POLITICS.

During the late Provincial election campaign several of the more prominent Opposition candidates—some of whom had been members of the last legislature—made it an issue that naturalized citizens who came hither from countries with which we are now at war should be disfranchised. It was generally supposed that the proposal was of only local origin and that it had been raised simply as a means of appealing for votes on the strength of the war feeling. Rather a contrary impression is given by a bill that has been introduced into the House of Commons by Col. J. A. Currie, Conservative member for East Simcoe, and which proposes to amend the criminal code of Canada to the following effect:

79. A. Any person who votes for any person, for any public officer, or who takes any active part in any election for any public office by becoming a candidate, speaking, writing, canvassing or driving voters to the polls who was or is a citizen of any country, now or at any time during the past five years at war with Great Britain or her Allies; or who was a subject of any country not allied with Great Britain or her Allies, which does not permit its citizens the rights of expatriation, or holds the doctrine of dual citizenship or who was exiled or banished from any allied country, even though such person may have been granted naturalization in Canada or Great Britain, or may have his or her name on the Voters' List; shall be deemed guilty of an offense under this Act, and on conviction before a court of competent jurisdiction shall be liable to imprisonment for a term of not less than two years, together with forfeiture of civil rights and all property to the Crown.

B. The above provisions shall not apply to any person who is serving or has served in His Majesty's Forces, or has been a naturalized British subject resident in Canada for twenty-five years. The burden of proof as to such exception shall rest upon the Voter.

C. Any person giving such information as will lead to the conviction of any such person shall be entitled to one-third of all fines and forfeitures.

The proposal is therefore before Parliament that Canadian citizens who were born in enemy countries shall be not only disfranchised, but that any of them who take any part in elections or express any opinions during election campaigns shall also be deprived of all civil rights, dispossessed of their property and put in jail. Coming on the heels of the campaign in Alberta, this proposed law may be supposed to have originated in the issue raised by Opposition candidates in this Province, and to embody the purposes they have in mind. The propaganda has now got formally before Parliament, and if it does not become the law of the land it will only be because Parliament explicitly refuses to pass the bill.

## ANSWERS

This department does not pretend to be infallible. It will endeavor, however, to answer questions sent to it by readers of The Bulletin to the best of its ability, reserving the right to ignore all that are trifling or of concern only to the questioner. To receive attention, every inquiry must bear the name and address of the questioner. This information is not wanted for publication, but as an evidence of good faith.

## Railway Commission.

To The Bulletin.  
Would you give the names of the Dominion railway commissioners?  
R. L. C. Edmonton.

Sir Henry L. Drayton, chief commissioner; D'Arcy Scott, assistant chief commissioner; Hon. W. B. Nantel, K.C., chief commissioner; S. J. McLean, commissioner; A. S. Goodeve, commissioner.

## Commander French Armies.

To The Bulletin.  
Who is the commander of the French armies in succession to General Joffre?  
E. L. A. Edmonton.

General Petain, who gained distinction in staying the Germans at Verdun.

## Parties in Saskatchewan.

To The Bulletin.  
What was the standing of the parties in Saskatchewan after the last provincial general election, with votes polled?  
R. L. C. Edmonton.

Forty-six Liberals were returned and eight Conservatives. The total Liberal vote polled was 49,841, the Conservative vote 36,424 and the Independent vote 1,318.

## Deepest Mine in World.

To The Bulletin.  
Which are the deepest mines in the world?  
D. C. Edmonton.

The deepest mine in the world is said to be the rock-salt mine at Spangenberg, near Berlin, which is 4,175 ft. in depth. It is not, however, quite perpendicular. The deepest British mine is the Dunhill colliery, near Wigan, which is 2,824 feet. The deepest boring in the world is the artesian well at Potsdam, Mo., which is 5,500 feet, or 220 feet beyond a mile.

## LEGAL INQUIRIES

Legal questions will be answered in the columns of The Bulletin, after being submitted to The Bulletin's own legal representatives. Write on one side of the paper, and send stamped envelope for reply.

## Interest on Account.

To The Bulletin Legal Department:  
Can a merchant charge 10 per cent on an old debt over one year standing?  
A. C. H.

No. A merchant cannot charge any interest on an account unless his creditor or his statement forms state that interest will be charged on all overdue accounts and then he can only charge interest at the rate of five per cent. In order to be able to charge interest at the rate of 10 per cent, he would have to have an agreement with the debtor to pay interest at this rate.

## Rent and Sale of House.

To The Bulletin Legal Department:  
I bought a house last fall. Can the party who sold it legally claim the storm doors and windows? He lived in the house until the 30th of April, but did not pay me for any time in April. He went away without letting me know anything about going and he also took the storm door and storm windows with him. Can he legally claim them? He says they were not on the house when he sold it, but in the basement of the house, and he did not reserve them. I claim he owes me a month's rent. Is this the case? He agreed to pay me \$10 per month.

S. L.  
In my opinion, the storm door and windows would be included in the sale of the house and that therefore the vendor cannot take them away with him. In regard to the rent, you are, of course, entitled to full month's notice. If the notice is not given, you are entitled to be paid one month's rent.

## With the Humorists

**Over-Fulfilled.**  
Ragged Rogers—Strange how few of our youthful dreams come true, ain't it?  
Frayed Phil—Oh, I dunno. I remember how I once yearned to wear long pants. Now I guess I wear 'em longer than any man in the country.

## Wrong Pew.

"Scuse me, sir, is this the Press Bureau?"  
"Yes, my child. What can I do for you?"  
"Mother says could you 'ave these trousers done by Toosday?"—Passing Show.

## Mean.

Hubby—Well, since it takes two to make a quarrel, I'll shut up.  
Wife—Isn't that just like a contemptible man. You'll sit there and think mean things.

## At Vimy Ridge

"(Nothing like our barrage ever was seen in war. I'm certain. It flamed and thundered like a million dragons just ahead of us, as though we were holding it on our bayonet points."—Press dispatch.)

Out of the heart of the North they came.  
Full of the ardor of plain and sky, The boys of the Maple in khaki clad, Ready to do or die to the end.  
There was a courage of freedom born, Crimson'd with faith of an ancient day; Like tigers they stood at their hostile prey.  
At Vimy Ridge.  
Easter had shed its halo of light  
Where the village spires were dreaming of prayer,  
And the faith that had lifted each soul from the sod  
Blossom'd anew in the morning air.  
Across the sky a serpent of fire  
Lifted its head, with a hiss and roar,  
And, sweeping the Ridge from trench to trench,  
It lifted, and poised, and dropp'd, and tore.  
At Vimy Ridge.  
The boys of the Maple pressed on and on,  
Through mud and shellholes, 'mid smoke and din;  
Trench by trench was emptied of Boches,  
For steel is sure in the end to win.  
Then honor the heroes who won that day—  
A fame that shall live with the burning stars;  
Whose courage and faith were born of heaven,  
As they knelt in duty at the altar of Mars.  
At Vimy Ridge.  
—THOMAS O'HAGAN.

## WHEN END WILL BE IN SIGHT.

(From the London Observer)  
When the submarine menace is mastered America is ready to put a million men into the battlefield, the end will be in sight, but not before.

## LORD NORTCLIFFE.

Lord Northcliffe was not afraid to tell Great Britain the truth about the war at a time when such truth was unpalatable and almost treasonable, but it was the best thing he could do. He was a man of courage and truth, and he was a man of vision. He saw the need for a new kind of leadership, and he was the first to give it.

## USELESS ON BOTH SIDES.

(From the Albany Argus)  
It is said that quite a number of Americans have gone to Canada to escape conscription and that quite a number of Canadians have come to this country to escape military service. Does Canada want to swap a job lot of perfectly useless Americans for a job lot of perfectly useless Canadians?

## CONSCRIPTION REFERENDUM.

(From the Calgary Albertan)  
If Sir Robert Borden had brought on a referendum on conscription on the day that he announced the policy we would have been voting on it before the bill gets its second reading in the house of commons.

## WHERE LIBERALS STAND.

(From the Toronto Globe)  
It is earnestly to be hoped that the government of Ottawa will try to bring its war policy into conformity with the demands of Liberal scruples. The Military Service bill, considered by itself, does not meet the demands of Liberal principle. It is a bill that is a direct challenge to the democratic spirit of the times.

What is the attitude of the Liberals of Canada? For them there can be no turning back until the barbaric foe, who fights with the blood-lust and ferocity of the unredeemed savage, is beaten to his knees. The military power utterly destroyed. This war is a fight for Liberal principles in the relations between man and man and between nation and nation. It is for the Conservative who favor a nation-wide mobilization for war purposes to make their position clear in the eyes of the nation. There should be no conscription of the national service and national sacrifice is claimed for those who traffic in the base metals of gold and silver.

The platform of Canadian democracy is that set out in the resolution of Hon. George F. Graham, and which represents the attitude of Liberalism toward the compulsory enlistment of the young men of the country. It calls for the immediate and effective contribution to the cause by accumulated wealth, and demands the mobilization of the resources of all agricultural, industrial, transportation and natural resources of Canada, "so as to insure the greatest possible assistance to the empire in the war, and to reduce the cost of living to the Canadian people."

The vague promises of Hon. Thomas White, that steps in this direction will be considered next year, cannot be accepted as an honest effort to change the nation's obligations to the men in the trenches and to the Allied cause. If the need of men at the front is urgent, so also are the questions of the economic stability of the country and the equitable distribution of the burdens and sacrifices of war. The Liberal position has not changed. At the Maney calling meeting, in the great press, and in the Liberal ranks throughout the country the call for national service and national sacrifice has been clear and unmistakable. From whatever quarter that demand comes, it is weighted with the determination of a democratic people to make the obligation to serve national in its scope. No one must escape the fair burden of a national and a righteous war. It is given to the younger sons of Canada to glory in the thought that they are unworthy of their country. To them the supreme sacrifice and the immortality of fame. Who in Canada will value gold and silver and temporal possessions against the life of one of these?

Let the Liberal who demands conscription together. The battle of democracy must be fought and won at home before Canada can fight effectively and successfully the battle of world-democracy on the fields of Europe.

**Hoe Instead of Gun.**  
"Every man should know something about firearms." "Yes," replied Farmer Cornsloss. "But he ought to know something about the hoe. I've just took my boy Josh's shotgun away from him and told him to keep busy with the hoe."

**Nobody Yet.**

Small Boy—Nobody ain't come yet; but pa says the first fellow that comes can have her.

## Lac La Biche

Bulletin Correspondence.

The fine weather of the last few weeks has brought here quite a few summer guests already who have kept the town hotels busy and quite filled up, in addition to the regular commercial and business travellers.

The Lac La Biche Inn, which has also been recently opened, has entertained guests since the beginning. A few venturesome people have already started bathing. However, the opening of the bathing season will not be, by common consent, for a few weeks yet, when the chill is right off the water.

The Saturday gasoline train, arriving at noon time, brought quite a crowd of week-enders, who will enjoy the warm and dry weather is good for the hotels and summer trade, the exceptionally long dry spell is most serious for the crops. In the Plamondonville district they are reported to be very backward and in need of rain. Mr. Greuner, from the Big Bay district, or as it is called now, "Jellieco," according to the railroad time-table, states that the crops there, up to the present, do not amount to anything. From the Bouvier district comes the news of pretty fair and promising crops. At Lac La Biche itself, the land is parched for want of rain, besides the usual night frosts, there were frosts. The little rain sprinkle of a few days ago, hardly moistened the soil and an inch or so from the surface the ground is powdered.

Arden stuff, planted six weeks ago, has not come up yet, and even a second sowing fared little better.

It is getting quite late in the season, and unless we get some excellent growing weather, many crops will be lost. We will have to make the most of the weather we have, and try to get the most out of it.

The Lac La Biche Board of Trade held a meeting recently, at which arrangements were made for the annual sports to be held on July 1st.

**Nothing Strange.**  
"Strange how Mr. Woodby Swellman hates everybody who is in trade."

"Nothing strange about it. People don't usually love their creditors, you know."

Take all or any of these greens, strip leaves from stalks, wash and plunge into boiling salted water and boil with sautepan lid off to keep the colors. Dandelions require two waters, as they are inclined to be bitter. When perfectly soft and cooked, strain very dry, add a piece of butter, pepper and salt, and beat with a fork. A little cream will also be an improvement. Serve very hot. Dandelion leaves also make an excellent salad.

While we are on the food topic, we will give a hint to those who make their own bread, or bannock, as to how they can beat, in a measure, the high price of flour. Add bran when kneading the bread until it becomes a nice brown color.

Strong bakers' flour, which once we bought for \$1.55 at Athabasca Landing, is now something like \$5.50 a bushel in Edmonton, while bran is only \$2. per hundred. You get a nice looking and a most tasty and healthful bread and reduce the price of flour in proportion as you add bran.

Kind and trusted reader, should you try and approve, pass on the him in a whisper, as otherwise the food pirates may screw up the price of bran, as high as that of flour.

The Dominion land sub office has been opened in the business centre, as was repeatedly requested through these columns, and the office does justice to the demands to the fullest. One day during the week three Americans stepped off the train and into the new land office to get particulars of homesteads available. This convenience saving them a six-mile trip to the mission and back and putting them in a better frame of mind with the country and its arrangements.

The new mail service, changing the day for dispatching and receiving letters, etc., was inaugurated without previous notice, thus disarranging all business, money, checks, drafts and all outside business being held up for a week. This act of the postal department is about on a par with the marine and fisheries department, which put on new restrictions the day before the opening of the fishing season, upsetting the whole industry.

King Solomon, in all his wisdom, declared that he could not father a child with a maid with a man. He lived in these times as a private individual around here he would have paraphrased this with the saying "The inconsiderate ways of the present Dominion government with the public are beyond all understanding."

The big hawks during the last week or so, demolished the fish catch in measure. It is not on easy thing, for a fisherman to go to his nets in his little boat while the white-capped waves are running high, and it is a hazardous and difficult job to haul on and to disentangle from his net a big ten or twelve pound fish, which has rolled and twisted itself up in the net, while the heavy sea tosses his boat five and six feet up and down all the time. The price for white fish paid to the fishermen is at present 2c per lb. undressed, and they earn their money.

The quality of the fish is surprising and is a puzzle to the fish catchers. The fish are heavier and bigger than those caught last year. Whittish weighing 12-15 lbs. are a common occurrence. Some of the men consider these large fish to have come into the lake during the early spring from Lake Athabasca. We know that right after the ice breaks up, and perhaps before, whitefish come to McMurray and are taken in spring as far as Mountain Rapids, about six miles above McMurray.

It is very possible that the whitefish, which is a very strong swimmer, will make its way up the rapids in low water and then ascend into this lake, by way of Lac La Biche river.

On the left-hand side of the island, in a little eddy, close to shore, in the very middle of the tremendous fall of the Great Rapids, we have taken good-sized chubs, with hook and line. If these small fish were able to find their way up this cataract, it is very possible that the big whitefish can force their way up through the much easier right-hand channel.

The habits of northern fish are very little understood. If one has the time and money it would be very

interesting surely to study them. The whitefish is a surface feeder apparently and in this season of the fish flies has a gay old time. When the sun is going down he can be seen jumping and splashing all over the lake.

The Provincial Game Guardian has been here in connection with his official duties, posting and circulating the regulations. Big game, especially moose, seems to be exceptionally plentiful this year in this district, which has always been a fine moose country.

The outlook for our cheap supply of winter meat is good and consoles us for the present doubtful potato patch. Mr. Henderson, who is in charge of the work on the line, was held up the other day by a big bull moose, which would not go out of the way of the speeder, and, with tossing horns, showed fight.

The work of ballasting the road north from Lac La Biche is under steady progress and, as Mr. McArthur states, the railroad will be into McMurray by October 1st.

The Hon. A. G. MacKay, Liberal candidate for the Athabasca riding in the deferred election, has been in McMurray. He left here Tuesday evening and arrived at McMurray the following evening, in time for his meeting. As we understand, he had to undergo a great deal of questioning and interpolations from the McMurrayites about the long, long delayed arrival of the railroad. On his return, Mr. MacKay made a record trip. He left McMurray, or rather the end of the steel, sixteen miles from McMurray, at three in the morning, per gasoline speeder and arrived in Lac La Biche in time to catch the outgoing 8 a.m. train for Edmonton—thus he had early breakfast in McMurray and early supper in Edmonton.

For old-time travelling, from McMurray to Athabasca Landing, 12 days was the record.

The Lac La Biche Board of Trade held a meeting recently, at which arrangements were made for the annual sports to be held on July 1st.

**Costs Much Effort.**  
"Begins attaches a great deal of importance to his opinions."

"You can't blame him," replied Miss Cayenne. "An opinion costs him so much intellectual effort that he feels like making a pet of it."

**Far Away Look.**  
"I can always tell when my husband is going to be close with his money."

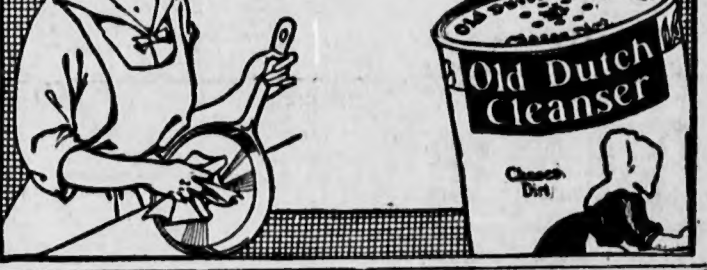

"How?"  
"By his far-away look when I ask him for some."

Leadership in the church, high ideals and chivalrous action in society and in the home, honesty and integrity in business life, and true statesmanship in political life, as shall make our political impact upon this western civilization a great contribution to its noblest development.

**Next Best Education**  
This, we believe, can best be done by means of the Christian college, and for us can best be done by strengthening our already existing colleges and by a continued and greater emphasis of the need of education under Christian auspices.

Mr. Huntley insisted that, first, a Christian education must be a real education. The curriculum of a Christian college must be abreast of the times. To try to cover with the word "Christian" inadequate equipment, narrow vision, antiquated methods, and a tendency to reject Christ's fundamental demand for integrity. It ought never to be possible for anyone to call in question the competency in the field of education on the ground that we are Christians.

Christian education, however, must take advantage of every modern development, of science, of natural science, of the historical spirit, of the new psychology, of sociology, without the sacrifice of truth, of ethical ideals, of religious faith. Christian education must couple an earnest moral and religious emphasis in education with freedom and ability to think within the broadest lines of secular knowledge.

Never, said the speaker, was there an age that needed such an education more than the present, and never was there a growing country in greater need of it than ours. We have fallen upon an age of materialism. Everything today is brought to the judgment seat of utility. What can do? What is it worth? are the questions of those who are impatient of everything that cannot be measured with a yard stick, weighed in scales and estimated by dollars and cents. This tendency has been greatly increased by the exigencies of the war. Our visions are necessarily full of ideals of mighty physical forces. I contend that this is a most dangerous state of mind for an individual or a nation. It is more dangerous to deprive a nation or a people of their ideals than to cut off their food supply. It is worse than pestilence, or earthquake, or famine or fire.

**Where Germany Failed**  
The speaker emphasized the need of the development and strengthening of moral ideals and of character, pointing out that the great failure of Germany today, despite its education, was its failure to inculcate character. We need this Christian education to meet the needs of the new day which is upon us. It was the day of democracy, a day upon which Baptists

## Raised Mile of Steel In Yellowhead Pass In Six Hours Time

Work of Removing Rails is Being Conducted by B.C. Railway Construction Corps—Expect Soon to Increase Record to Two Miles Per Day—Men Are Showing Great Aptitude for the Work to Which They Have Been Allotted.

Working of lifting the steel of the transcontinental at Two Jaws Cache Creek, B.C., is being conducted rapidly, according to reports brought to the city from the west. The work is being done by 150 men of the B.C. Railway Construction Corps, raised in Vancouver and New Westminster by Major V. L. Marsh. This draft, which left New Westminster a few days ago, has just completed a week's practical experience in railway work, helping out the plans of the Dominion Government to remove some sections of steel from the transcontinental line.

The men of this draft from the Railway Construction Corps are getting seasoned to the work they will have to do when the corps reaches France. Men Handle Work Well  
In the first week's work the men have shown that they know how to take hold intelligently of whatever is required in construction. Almost every man has had experience in some branch. The first work undertaken was clearing and rough grading of a right-of-way, 2000 feet long for a short line connecting the G. T. P. and Canadian Northern Railways ten or twelve miles east of Jasper. The work was done in less than three days with a swing and spirit that showed what the men could do. Later the detachment was transferred to the work of lifting steel on a 33-mile section of the transcontinental between Grant Brook and Gekko, one of the portions of line which is to be abandoned.

**Record for Quick Work**  
Lifting this steel is now proceeding and the men have made a record for smart work in six hours actual work, the first put in on lifting steel, over a mile was raised and loaded on flat cars, all the spikes, bolts, angle bars, etc., being picked up and loaded also.  
So far the work of lifting the steel and loading it, has been done without the use of a crane, and it is the opinion of experienced railway men that the rate could not be increased even to a crane used. By the time the men have half this section of steel up, they will be doing so well, they confidently expect they can make a record of two miles a day.

The hour of work are so regulated as not to be irksome to the men, and with the life in the splendid mountain air of the Pass, the net result is that the men are in the pink of physical condition. Their spirits, too, are unflagging, and in spare hours sports in camp, and outing and fishing excursions to the many mountain streams which run into the headwaters of the great waterways which take their rise here, give pleasant relaxation. The men enter into their sports with zest, boxing matches, football and baseball, being among the pastimes. The men have the equipment for these games, and they thoroughly appreciate them. Those who are fond of trout fishing have found many favorite pools, and many strings of choice speckled beauties have been brought in.

**Number of Cross-Overs**  
While the B.C. Railway Construction Corps, which has begun the work of removing the steel from the abandoned section of the two railways, does not anticipate a long delay, it is going to take a long time to complete the plan of consolidating the two railways into a single line. Already three cross-overs have been made and in one place the Grand Trunk is using the C.N.R. tracks, while on another section the C.N.R. is preparing to run over G.T.P. tracks. There will be a number of these interchanges, those portions of each being left which will best suit the combined traffic of the two roads.

On the work of taking up their first section of abandoned line, the Dominion department of railways and canals is in actual charge of the operation, Alex. Ferguson of Edmonton being in charge with W. C. MacFarlane as assistant on the work. The G.T.P. is represented by Messrs. Willis and Donovan. Lieut. Blackman, who commands the detachment, is fortunate in having as one of his assistants Lieut. T. E. Price, whose long experience as divisional engineer with the C.P.R. is a great assistance.

## BELGIANS ARE SCEPTICAL OF ENEMY DESIGN

Believe Civilians Carried Off Compelled to Do Enemy Work

Havre, June 19.—It is generally believed in Belgium that the fact, officially denoted by the Belgian government, that the Belgians have begun again to carry off Belgian civilians and compel them to perform work useful to the enemy. According to forms for the inhabitants of Mons presented to the German authorities and to the Belgians, these facts, which are being carried off in categories—men from 18 to 16 to 17 and 41 to 60; women to 35, and from 36 to 60; children from 10 to 15, and from 16 to 25, are being carried off to the identity of the person, his or her profession or of employment.  
An American having occupied official position in Ghent was recently expelled from Belgium. He had formed the Belgian government authorities that about April 10 officials demanded of him a list of Belgian workers, members of the Belgian government, or upper classes without occupation and in addition to persons employed in the Belgian government, together, justly, in the opinion of Belgian authorities, the live prehensions as to the design.

### O'MARA FAILS AT COAST

Boss Robinson, of the Brooklyn Dodgers, must have had the right dope on Shortstop Ollie O'Mara when he shipped him to the minors. O'Mara, according to reports, has failed with the Oakland Pacific Coast league club, and Owner Ebbets is trying to place him in a Class A league.

## EITHER AMATEUR OR PROFESSIONAL

### Measures Taken With Regard To Control Of Hockey In States.

MONTREAL, June 20.—At a joint meeting of the Amateur Athletic Union of the United States and the International Skating Union of America, held in New York during the week-end, it is learned, action was taken which will have the effect of putting semi-professional hockeyists south of the border beyond the pale of organized hockey, compelling a player to either show he is an amateur or content himself as being classed as a professional. No mention was made of similar regulation of semi-pros in Canada, but it is probable that the measures taken in regard to the game in the United States will automatically result in similar control here. Hockeyists will have to put themselves under the yoke of the International Skating Association or let its members suffer the penalty.

This action taken at New York is the outcome of negotiations that have gone on for some months. The International Skating Union of America, an organization which was formed in Montreal eight years ago, will have the support and co-operation of the Amateur Athletic Union of the United States in bringing the few remaining opposing organizations in New York and Boston in line.

**Broke Even**  
BOSTON, June 20.—Boston today won the first game of a double header, 7 to 4, and New York the second, 3 to 0. Opportunity Boston batting and poor fielding was the story of the opener. Burns' double on the first pitch of the second game and Kauff's subsequent single gave New York the only run of that contest.

**No Difficulty**  
PHILADELPHIA, June 20.—Philadelphia had no difficulty in defeating Brooklyn in two games here today, the scores being 7 to 3 and 9 to 2. The first game was won by bunting hits with errors, while in the second the home team hammered out 17 hits, which included five doubles and a home run.

**Had to Catch Train**  
ST. LOUIS, June 20.—Pittsburg played St. Louis to a six inning 4 to 4 tie today, the game being called to allow the visitors to catch a train.

**Last Inning Rally**  
CINCINNATI, June 20.—Cincinnati made a ninth inning rally here today and beat Chicago, 5 to 4. The game was replete with sensational fielding and exciting situations. Chase's brilliant playing and Gale's timely hitting and base running were outstanding features.

**Out of Last Place**  
WASHINGTON, June 20.—By defeating Philadelphia, 5 to 3, Washington climbed out of last place of the pennant race and forced the Athletics to the bottom. The locals hit Schauer opportunely.

**Ninth Inning Vital**  
NEW YORK, June 20.—New York and Boston divided a double header here today, the locals taking the first game by a score of 3 to 2 and the world's champions winning the second, 3 to 1. Both contests were decided in the ninth inning. In the first game New York won when

pinch hitter Nunamaker bunted safely on a squeeze play, scoring Fipp. Boston made only five hits off Culp and Russell in the second game, but won by scoring two runs in the ninth.

**DETROIT POST**  
DETROIT, June 20.—Spencer's error on a throw to the plate in the eighth inning permitted Miller, running for Severid, who had doubled, to score with the run that gave St. Louis a 3 to 2 victory over Detroit today.

**Error and Triple**  
CHICAGO, June 20.—Eddie Collins' triple and Wambagans' error gave Chicago a 3 to 2 victory over Cleveland today. The locals won in the sixth, when E. Collins sent home two runs. Collins pulled up at third, but when he saw Wambagans' fumble Speaker's return of the ball he dashed home with the winning run.

The opinion seems to be generally held that the ball teams of both major leagues lack pep this season. No particular reason is given for this condition, but the fact is that the players go through their performances in a most uninspiring manner. They will all probably wake up one of these days and we'll again see some of the old stuff that made all of us stand on our toes. Let's hope the change will come soon.

## Sporting Facts and Fancies

Pitcher Win Noyes is making considerable noise for the Athletics and Connie Mack is making him perform on the mound just as often as he can. There is more than something in the front as well as the end name of this young baseball artist.

Just because the Montreal team of the International League drops a few notches in the league standing now and then, it is no sign for the fans from that fair city to become perturbed. There's good stuff in the team and good stuff will out. So cheer up, everybody, and look out for the bunch from Montreal.

Here's Old Tilly Walker of the Red Sox batting like a regular fiend. Tilly has improved all around since he has been assigned to Tris Speaker's place on the Boston team, especially with the bat.

Speaking of the Red Sox, there's nobody more enthusiastic about them than President Frazee, who bought them from Joseph J. Lannin. Boston fans are showing their appreciation for the work of their home team by being on hand as often as time and their purses will permit.

The Giants feel seriously the loss of Lew McCarty, their hard hitting catcher, who recently broke his leg at Cincinnati. It will be three weeks at least before he will again appear in the line-up, and perhaps McCarty is not alone a top-notch player behind the bat but his work with that instrument has done much to put McGraw's men in their present high place. This is the second accident of a serious nature sustained by a Giant player this year. Herzog, the victim of the first, is still suffering considerably and is far from being able to play his best. McCarty sustained a broken hand while with the Brooklyn club last spring, but had escaped injury so far while with the Giants. The burden of catching for the McGrawites is now on Bill Raden, a very able man but not as good as McCarty with the bat.

## GILLETTE SAFETY RAZOR

The Razor of National Service.

The Gillette reduces shaving time to five minutes or less—an actual saving of a week of working days a year! To the man who depends on the barber, it saves still more time, and from \$25 to \$50 or even more annually. This means the cost of one or several War Savings Certificates.

Moreover, there is not a man living with a beard to shave who cannot shave better with a Gillette if he will use it correctly—with the blade screwed down tight and a light Angle Stroke.

For the thousands of young men just reaching shaving age the Gillette Safety Razor is a source of good habits—not only thrift, but punctuality, personal neatness, and efficiency in little things. For yourself or your son, at home or Overseas, it is a splendid investment.
